

Find your solution to hair loss with VitalityMDs

If you're among the 80% of men and 40% of women who are experiencing significant hair loss by middle age, there is no better time to find a solution at VitalityMDs.

For men, thinning often begins before middle age with male androgenetic alopecia starting as early as the teen years. This common condition typically starts with receding at the hairline and crown of the head. Women often experience alopecia after menopause with as many as two-thirds of women experiencing thinning hair or bald spots.

In addition to aging, both sexes can experience hair loss due to factors such as heredity, hormonal changes, medical conditions, stress, medications, and supplements.

“There are a number of solutions for hair loss,” Tonka Quni, MedSpa Director. “We often start by checking thyroid, hormone and other blood work that could affect the hair. This helps us create a personalized solution for each patient.”

Among the most popular solutions for men and women ages 18+ are products DeRive, Ethica and **Nutrafol**. Nutrafol is available for purchase on-line and in-office. DeRive and Ethica are sold in-office only. VitalityMDs also offers the following treatment options to help achieve thicker, healthier hair.

Alma TED (TransEpidermal Delivery) - a groundbreaking, non-invasive hair growth treatment for hair loss, hair thinning, and hair shedding. This non-invasive treatment works by using sound waves and air pressure to enhance the penetration of powerful topical scalp hair growth formula into the scalp, stimulating hair follicles for thicker, stronger, healthier hair. **Alma TED** is ideal for a variety of nonscarring alopecia, male and female pattern baldness.

CapillusRX - an FDA-cleared, wearable, battery-operated laser therapy device designed to restore thinning hair due to genetics (androgenic alopecia) and prevent the progression of hair loss. Easy to use and with no known adverse side-effects, **CapillusRX** is safe and effective for treating thinning hair and balding and revitalizing damaged hair.
